

Manage projects, and track, organize and preflight all your fonts and digital assets with ease!

Cumulus+FontAgent Pro Workflow Software for Adobe Creative Suite from Moksa and Insider Software

TypeTrax adds the missing link to your digital design projects. Just drag a document into Canto Cumulus and TypeTrax automatically detects and displays the project's fonts in WYSIWYG mode—so you always have the right fonts.

- Works with Canto Cumulus and Insider Software's FontAgent Pro to add fonts and their metadata to your Adobe InDesign projects
- Drag a document into Cumulus and TypeTrax automatically catalogs the fonts required
- View native fonts and metadata with a few clicks from within Cumulus
- Check out an InDesign document and watch Cumulus and TypeTrax automatically preflight it to include the fonts, images and resource files you need
